Perfection

WHEN SAFETY MEETS HIGH-END DESIGN

As an extension to the Ashley Uno, Duo and 210 Series, Ashley TR™ incorporates all the great attributes and features of these series with an additional safety component. With Tamper Resistant receptacles, you can rest assured that everyone, from children to the elderly, will be powerfully protected. The interior shutter mechanism located in the interior walls of the simplex, act as a protective barrier from foreign objects entering; allowing only plugs to be inserted when pressure is simutaneously applied. Our receptacles are marked with a "TR" on each faceplate, easily identifying them from other products on the market.

The Ashey TR product offering is available in one and two power configurations with USB ports that utilizes a Smart Device Recognition Chip to monitor and independently deliver the required amperage to the connected devices. Equipped with a 90-degree plug, this product is able to bring powerful tamper resistant receptacles to your space with various cord length options including 6', 9' and 10'.

The Ashley TR™ Series is offered as a clamp-on, under or bezel mounting option in select Uno, 210 and Duo configuatrions and is UL 962A listed.
